INTRODUCTION

Immigration and Population Statistics is published as a companion to the series of documents and reports issued by the Canadian Immigration and Population Study.

The statistical data presented in this pamphlet have been selected to assist public discussion of population issues from the viewpoint of immigration policies and programs. The aim has been to make available in a single document a comprehensive compilation of statistics which will enable the reader to study the composition of Canada's population and immigration, and trace their development over time.

Data have been chosen for their likely interest to the serious layman, rather than to the technical expert. Thus, while statistics are provided on population and labour force, they are not as detailed as those found in Census and Labour Force Survey reports. On the other hand, the immigration figures are more detailed than those found in regular publications of the Department of Manpower and Immigration and many of them are being published for the first time.

The choice of tables was dictated to some extent by the nature of the source data and the time constraints imposed on the study. The reader will therefore find inconsistencies between some of the tables, particularly with respect to geographic aggregation. Britain, for example, is identified separately from Europe in some tables, simply because it was the predominant source of immigrants in the first half of the century. Figures from the Census take us only to 1971, while immigration data carry through to 1973. Even here, however, some immigration characteristics are not shown for past years simply because they were not collected at that time.

Most of the tables were compiled by the Program Data Division and Strategic Planning and Research Divisions of the Department of Manpower and Immigration from departmental records and Statistics Canada publications. Some of the data were supplied by other departments and agencies. Sources are identified in all cases. Errors or omissions in reproducing these figures are, of course, the responsibility of the Canadian Immigration and Population Study.

Population Projections
to 2001

POPULATION PROJECTIONS TO 2001

The following population projections were recently published by Statistics Canada.* They are the first to be released in an official publication, and cover projections at both national and provincial levels through the year 2001. Four of the projection possibilities are included in this statistical supplement to the Canadian Immigration and Population Study. Readers requiring more detail are referred to the Statistics Canada publication.

The projections are in no sense predictions, but show what the future growth and distribution of population will be under stated assumptions. The assumptions developed in the study regarding future mortality, fertility, international migration, and interprovincial migration, relate to the period up to 1986; for later years they are kept constant. Each of these components of population change were projected on the basis of past trends and a range of likely movements in the future. Plausible combinations of the components were then applied separately to the population estimates of each province and territory, by sex and single years of age. The resulting projections were then aggregated to produce national totals.

A single mortality assumption was used in the projections. Based on an analysis of recent experience in Canada and other countries, a further moderate decline in mortality was projected over the next 15 years. Expectation of life at birth was assumed to rise from its level of 68.8 years for men and 75.2 years for women in 1966 to 70.2 years and 78.6 years, respectively, in 1986.

The study's assessment was that future trends in fertility are extremely uncertain, given the wide fluctuations of the past 50 years. A continuation of the steep decline of recent years, or a baby boom of post-war proportions, were considered unlikely. Fluctuations within a narrower range were therefore postulated, and three alternative assumptions were used in the projections, ranging between a gradual decline to 1.8 births per woman and a gradual rise to 2.6 births per woman by the late 1970s or early 1980s.

The immigration and emigration assumptions used in the projections were based on the experience of the 1960s. During that decade three-year averages for gross immigration ranged from 80,000 a year during the period of low immigration, to 200,000 a year during the period of highest immigration. Estimated emigration fluctuated within a narrow range around 60,000 a year. From this analysis four immigration assumptions (ranging from 80,000 to 200,000) and one emigration assumption (60,000) were used for the projections, giving a net immigration ranging from 20,000 to 140,000. The provincial distribution of immigrants and emigrants (which has been fairly constant over the post-war period) was assumed to be the same as the 1968-71 average.

* *Population Projections for Canada and the Provinces 1972-2001*, Statistics Canada, Catalogue No. 91-514.

Interprovincial migration assumptions were based on an analysis of movements during the post-war period. These assumptions were integrated with the net immigration assumptions, since both were found to move in the same direction.

A large number of projections can be made by using all the possible combinations of these assumptions. In its study Statistics Canada published four projections, based on combinations which cover a range of likely possibilities. Another three projections are published to demonstrate the demographic perspective for certain provinces under such hypotheses as zero migration or a net migration gain in the future.

For the convenience of the readers of the Canadian Immigration and Population Study the first four projections are reproduced in this statistical supplement. The combinations of assumptions underlying them are summarized in the following table.

* Special permits authorizing the temporary entry to Canada of persons inadmissible under the ordinary provisions of the law.

** Special regulations authorizing the permanent or temporary admission of persons unable to comply with the ordinary requirements of the Immigration Regulations, or of persons designated in paragraph 5(d) or paragraph 5(a) (ii) of the Immigration Act.

The very considerable increase in the number of persons admitted under Orders-in-Council during 1973 is largely attributable to the special administrative measures taken during the summer of 1972 to reduce a large build-up in backlogs at two levels of procedure, i.e., in the immigration inquiry system and at the Immigration Appeal Board. The repeal, in November 1972, of Regulation 34 also contributed to the increase in the number of Orders-in-Council for 1973.

Note: Under certain circumstances a person may be entered to Canada under a Minister's Permit and subsequently become landed under an Order-in-Council. Therefore, the same person could appear in both columns.

* These expenditures include the cost of adjustment assistance to refugees and other recent immigrants, grants to welfare organizations and payments towards medical expenses of indigent immigrants. Such expenditures, including particularly assistance to Asians from Uganda, rose substantially in 1972-73.

** Includes the cost of administering the new employment visa regulations, and revised regulations applying to visitors. Budgets for fiscal years 1973-74 and 1974-75 also reflect the enlarged staff and facilities required to handle an increasing flow of traffic at international airports, and improved service at all ports of entry.

TABLE 9.3
CANADA'S FINANCIAL CONTRIBUTION
TO THE RELIEF OF REFUGEE SITUATIONS*

I Annual financial contribution to refugee assistance programs of the Office of the United Nations High Commissioner for Refugees (UNHCR) over the last 10 years:

1964 — \$290,000	1969 — \$350,000
1965 — 290,000	1970 — 350,000
1966 — 290,000	1971 — 400,000
1967 — 350,000	1972 — 400,000
1968 — 350,000	1973 — 450,000

II Contributions to special United Nations refugee relief operations in recent years:

- 1) The United Nations East Pakistan relief operation — 1970/1971 \$7,500,000**
- 2) The United Nations Relief Operation for Refugees in Bangladesh — 1971/1972 \$13,200,000**
— 1972/1973 8,592,000**
- 3) Financial contribution to a special UNHCR program of assistance to refugees and displaced persons in Sudan — 1972/1973 \$500,000

III Annual contributions (financial and material assistance) to the United Nations Relief and Works Agency (UNRWA) for Palestinian refugees in the Middle East (last 10 years):***

1964 — \$1,000,000	1969 — \$1,519,000
1965 — 1,000,000	1970 — 1,700,000
1966 — 1,200,000	1971 — 1,350,000
1967 — 3,006,000	1972 — 1,350,000
1968 — 1,519,000	1973 — 1,550,000

* The figures in this table represent major *direct* contributions by Canada to international refugee relief operations, and do not cover all programs which may involve assistance to refugees.

** The figures cover, for the most part, direct financing of material assistance in the form of food, medical supplies and equipment.

*** Canadian contributions to UNRWA have consisted mainly of food aid. A portion consists of monetary assistance (representing \$650,000 per year over the last four years).

Addendum

ADDENDUM

This addendum updates several of the statistical series of *Immigration and Population Statistics*. It contains the most recent figures available (for the most part, as of the third quarter, 1974) on population, immigrant landings, admission of students and refugees, employment visas issued, and the language capability of immigrants. A notation at the foot of each table refers the reader to the relevant table of *Immigration and Population Statistics*.

(3) This is the number of Chileans admitted under the ongoing Refugee Program. In addition, 829 Chileans were admitted as the result of a special program established following the coup in Chile. This group did not qualify for refugee status under the terms of the relevant United Nations Convention.

Il s'agit du nombre de Chiliens admis en vertu des programmes réguliers à l'intention des réfugiés. En outre, 829 Chiliens ont été accueillis dans le cadre d'un programme spécial mis en oeuvre à la suite du coup d'Etat au Chili. Les membres de ce groupe ne jouissaient pas du statut de réfugié tel que décrit dans la Convention des Nations Unies à cet égard.
